

Disability adjusted life years (DALYs)之定義

$DALYs = YLLs + YLDs$

$YLL = N \times L$  (eq. 5)

$YLD = I \times DW \times L$  (eq. 6)

英文	中文
N: number of premature deaths caused by a specific disease;	由特定疾病引起的過早死亡數；
L: standard life expectancy loss for each death in Eq. (5) or average duration of disease in Eq. (6);	每位死者的標準預期壽命損失，或等式(6)中之平均病程；
I: number of disabilities caused by a specific disease;	由特定疾病引起的殘疾人數；
DW: disability weight ;	殘障權重；
